

Cyber Security workshop in Hydrocarbon Sector Skill Council

HSSC conducted a Cyber Security workshop which was led by Shir Sandeep Singh Rana (COO HSSC) dated 15.07.2022. The purpose of this workshop was to educate its employees on how to identify and avoid existing and emerging cyber threats. Today there is no business or industry that is immune to cyber-attack. We need to protect sensitive information such as employees' details, etc therefore an organization needs to make sure that every employee in the organization is well aware & trained so that they don't lose this data to cyber criminals. With this objective a very engaging session was concluded by him.
